

THB package: unicode256\_2006-01.tar.gz

The following text clipped below contains characters above 127, so some viewers may not display it correctly.

On Windows you can view it properly using notepad;  
on most of all Unix OSes you can use lynx, a browser, or just 'vi'.  
In the case your console does not support ISO8859-1 characters,  
please use 'strings' or similar programs to avoid to garble the  
console.

The following command line generated the report:

```
guncoder report -v /usr/share/unicodeplus/unicode256.thb
```

Note this package only corrected the THB tables.

All Code-pages within unicode256\_2004-00.tar.gz are up-to-date.
